Good

ABOUT ME

I would like to introduce myself as an aspiring Back-End Developer. My hands-on experience with Node.js, Express, MongoDB, and TypeScript has equipped me with the skills to develop and manage effective backend systems. While my primary focus is backend development, I have a foundational understanding of frontend technologies, enabling effective collaboration in full-stack projects. I am passionate about solving complex problems and continuously improving my technical abilities.

EDUCATION

- | | |
|--------------|---|
